

## **BUSINESS OPPORTUNITIES FROM ISRAEL**

**March 2020**

Company Name	<b><u>Elsight Ltd. (54017)</u></b>
Contact Person	<b>Initial contact to be made via the Federation of Israeli Chambers of Commerce:</b> Ms. Yonat Keren International Relations Division Telephone: 972-3-5631020 Email: <a href="mailto:yonatk@chamber.org.il">yonatk@chamber.org.il</a>
Website	<a href="http://www.elsight.com">www.elsight.com</a>
Year of Establishment	2009
No. of Employees	30
<i>Offer No.</i>	<i>108158</i>
Summary of offer	<i>Cooperation / Joint Ventures / Representation: <b>Telecommunication, Connectivity, Bonding Technology &amp; cloud management</b></i>
<p><b><u>Description of Offer</u></b></p> <p>The company identified the growing need for connectivity in the rapidly expanding unmanned operations industry, with focus on drones. Today, always-on connectivity is one of the most pressing challenges for BVLOS unmanned platforms operations, which require reliable, redundant, secure, high bandwidth connectivity.</p> <p>The company offers advanced connectivity technology , ensuring reliable, secured, and high bandwidth, bi-directional data transmission from anywhere, to anywhere over existing network infrastructure, in real-time.</p> <p>Introducing the newest, most innovative product so far – The Halo Communication Platform.</p> <p>The Halo Communication Platform is equipped with the world’s most compact, next- generation bonding technology, enabling always-on connectivity.</p> <p>The superior connectivity technology provides secure, reliable, and stable communication through any IP pathway, making high bandwidth connectivity possible Anytime... Anywhere.</p>	

Implemented in Halo, the company's bi-directional algorithm encrypts any kind of data and/or video, adds a VPN, and then divides the data into packets. The packets are then transmitted via multiple IP links (LTE, Wi-Fi, RF, SAT) to their destination where they are received, decrypted and recombined.

Halo is Available as either a standalone external device or a lightweight internal board, easy to install and perfectly designed for integration with leading OEM's.

Halo is miniaturized and extremely lightweight and enables multi IP pathway connectivity for seamless integration, without requiring any power consumption or cooling. Moreover, Halo offers reliability & redundancy by automatically detecting failed communication channels and immediately transferring the data/video via an alternate available channel, in real-time and is equally well-fitted for data transmission on-the-move, or while fixed in place.

Potential Partners	Distributors, integrators, resellers. (L3 Harris, Lockheed Martin, Genetec , Verin, Accenture, Atos, T&T, Axians)
